

PRESS RELEASE JULY 2020

For: CONSTRUCTION PRESS & GENERAL RELEASE

July 6th, 2020 Toronto, ON

Legalett's GEO-Passive Slab Form & ThermaSill PH Products are now Certified Passive House Components

With the increase in High-Performance building construction throughout Canada & the USA, it's great to discover that Super-Insulated Slab Foundations & Insulated Threshold step construction just got Easier – especially if designing and building to Passive House Standards.

For over 20 years Legalett have engineered Air Heated and Unheated GEO-Slabs (Frost Protected Shallow Foundations), Insulated Concrete Basement Slab Forms and Suspended ICF Concrete Floors. With over 22 million square feet of Legalett Radiant Floor Heating Floor Slabs installed worldwide - Legalett have earned their worldwide reputation as *THE* pre-engineered ICF Floor slab forming system experts.

The Independent Certification of specific products to Passive House standards raises the bar higher for construction performance, underlines Legalett's expertise in super-insulating building envelopes and demonstrates an ongoing commitment to providing packaged solutions that Specifiers and Architects can rely on with confidence.
